

Road Map External.

The Project has 3 pages. Which are mainly the Homepage, the About me Page and lastly the My work Page.

The Home Page has a picture of me and a short introduction and below the page, the link to Social Media platforms where i can be found

For consistency, the tabs will always appear at the top of each page so that you can go from page to page instead of going to the Homepage

Also the last page will have a screenshot of the homepage of the website and right at the bottom it will have a link will direct you to the website.

The last page is the work that i have done and i have only done one project and that means there will be more space so my contacts will be in that page and the form where people can contact me through the website.

The About Me page will cover my Experience, Education, skills, goals and objectives.
